RTE-72-12-30A

12V converter for 48V or 72V batteries.

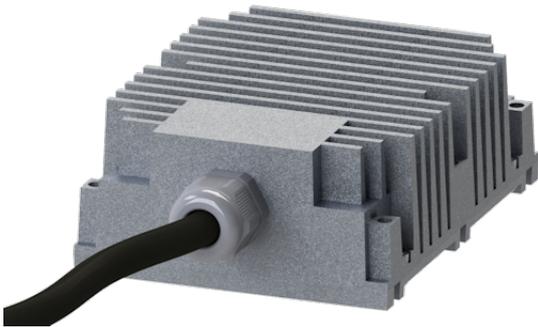

Voltage reducer RTE-72-12-30A is an isolated DC-DC converter with 48-72Vdc input and 13Vdc output.

The converter has an output with max available current 30A. It is used to supply regulated voltage for instruments powered with nominal voltage 12Vdc on plants with 48-72Vdc. source. The converter is housed in a sturdy aluminum case, resistant to mechanic stress, thermal stress and electromagnetic interference.

The system is equipped with a protection against the inversion of power supply polarity.
